Lancaster Farming

VOL. 8 NO. 41 | Lancaster Farming, Saturday, September 14, 1963 | $2 Per Year

CORN AFTER CORN FOR FIVE YEARS still makes big ears on this former pasture field. Even with the dry weather this year, John R. Zimmerman, Ephrata R1, expects a good crop of corn from this field. He believes in coating corn ground with steer manure and adding plenty of chemical fertilizer. He plowed down 300 pounds of 16-16-16 per acre and added another 100 pounds of 13-24-10 in the row. Corn is still green all the way to the ground. L. F. Photo.

Continuous Corn Produces Well For Ephrata Farmer

A converted pasture field on the farm of John R Zimmerman, Ephrata R1, has been in continual corn for five years and even with the dry weather is still producing a good crop

John took over operation of the farm eight years ago when his father retired. One of his first programs included laying out contour strips on the 60 acres.

The contours gave him longer rows, but cut across some fences. He tore out the fence rows, relocated fences and plowed part of the old permanent pasture

In part of the pasture he planted Penbel 69 tobacco which he just finished harvesting. "It was one of the biggest crops I ever harvested" he said Zimmerman gives much of the credit to the heavy coat of steer manure he puts on the farm each year, but he also believes the liberal application of chemical fertilizer pulled his crop through the drought year. "This is the first year I ever used high analysis fertilizers, but I believe it pays," he added.

Corn for grain has been in part of the converted meadow for five consecutive years, and it is still producing as well as it did the first year, even without the use of cover crops. Zimmerman said he tried ryegrass for several years, but he chops the corn stalks for steer bedding and he does not like the green material in the bales. He adds organic matter by spreading a heavy coat of steer manure on the whole farm each year.

Zimmerman feeds about 300 head of steers a year, buying them at about 1,000 pounds and feeding them short term on grain and corn silage. He now has 34 head of lighter steers which he plans to feed for a longer period on a heavy concentration of corn silage. He has a self feeding wagon which he built out of a flat bed wagon and the sides from a forage wagon. He chops corn directly into the wagon and pulls it into the barn lot. The steers eat from the wagon, and hogs clean up what the

County Future Farmers Attend State Leadership Training School

Five state officers of the Pennsylvania Association of Future Farmers of America from Lancaster County, along with the rest of the state officers, participated in the 20th annual Leadership Training Conference on the campus of the Pennsylvania State University this week.

The conference is designed to prepare these young Future Farmers for a year of service throughout the state. They had training sessions on how to conduct a successful leadership training conference and received instruction in public speaking, social conduct, correspondence and public relations.

On Tuesday the state officer team presented a high school assembly program, and visited the farm of one of the local chapter members. On Wednesday a live television program was presented on WFBG-TV, Altoona.

The five officers from Lancaster County are Carl Ginder, Mount Joy R2, president; Robert Wenger, Quarryville R1, secretary; Harold Herr, Millersville R1, treasurer; Larry Weaver, New Holland R1, vice president of Region II, and Melvin Breneman, Strasburg R1, chaplain.

Farm Calendar

Sept. 16 — 7:30 p.m. — Witness Oak FFA meeting in the Donegal Union High School.

8 p.m. — Drumore Community 4-H club meets at the Holtwood ball park.

Sept. 17 — 1:30 p.m. — Southeast district DHIA directors meet at Kutztown Grange Hall.

4 p.m. — Lancaster County Agriculture Teachers meet at Manheim Central High School.

8 p.m. — County Soil Conservation District Directors meet in the court house.

8 p.m. — Penn Manor Young Farmers Association meets in Penn Manor High School.

8 p.m. — Lincoln Community 4-H club meets in the Mount Airy fire hall.

Sept. 18 — Solanco Fair judging of all crop exhibits begins, Quarryville fire com-

4-H Barbecue Will Feature Horse Show

A special feature this year of the 4-H Leaders Council annual chicken barbecue will be a Gymkhana by the 4-H horse clubs of the county.

The affair will begin at 4 p.m. on the Lampeter Community grounds with chicken being served until 8 p.m.

All proceeds from the sale of the chicken will go to the county 4-H clubs to be used for ribbons, trophies, awards, trips and the support of the International Farm Youth Exchange program.

Houser Named Head Tester By D.H.I.A.

Wilbur Houser, Lampeter, was named Monday night to replace Jay Risser, 564 Lampeter Road, as head tester of the Red Rose Dairy Herd Improvement Association.

Action was taken at a special meeting of the board of directors of the association Monday night Houser's appointment will become effective immediately.

No reason for the change of head testers was given, but a spokesman for the DHIA said Risser will be asked to remain as supervisor of association 4.

Houser, supervisor of association 8 for eight years, was named outstanding tester in the Southeastern District by the state association in 1962.

Fulton Grange Holds Election

Gyles H. Brown was elected Worthy Master of Fulton Grange at a Monday night meeting in the Grange Hall, Oakryn. New officers will be installed at the October 14 meeting.

Other officers elected along with Brown were as follows:

David Wissler - Overseer; Stanley Stauffer Jr.-Assistant Steward; Charles McSparran-Lecturer; Ambrose Giffing-Steward; Mrs. Chas. McSparran-Secretary; Walter Wood-Treasurer; John Galbreath- Chaplain; Carl Eastridge-Gatekeep-

Changes Needed Wentink Tells Pa. Millers

Poultrymen are in for more belt tightening, according to Hendrik (Henk) Wentink, sales manager for Miller and Bushong, Lancaster County feed firm

Speaking at the annual meeting of Pennsylvania's Millers and Feed Dealers meeting in Pocono Manor, Pa., this week, Wentink said the state's broiler and egg producers must wipe out cost inefficiencies to bid for a greater share of northeastern markets.

The tightening up has already begun, Wentink said, but "we have some catching up to do and there is lots of room for improvement.

Despite some large operations and contract operations, Wentink said he believes the independently operated egg farm will continue to be the most important factor for a long time to come.

He said the corporate type of operation has not yet proved itself, and farmers still have a lot to learn about labor-management problems and other worries of corporations.

Predicting larger and more efficient units of production, Wentink said he believes Pennsylvania will retain its markets and expand them but "not without many changes and some heartaches too."

FIVE-DAY WEATHER FORECAST

Temperatures during the next five days are expected to average two to seven degrees below the normal range of 57 at night to 77 in the afternoon. Very cool weather Saturday is expected to give way to a gradual warming trend thereafter. Precipitation is expected to total less than a tenth of an inch falling as scattered showers towards the end of the period.

why a Wayne Pullet Program is good for your pullets . . . and you too!

Laying house failure can often be traced back to a poor pullet. Good pullets, properly fed and managed, can pay off in the laying house. The Wayne Pullet Program sets the stage for better egg checks this fall by producing pullets with a minimum of fat, at the correct stage of sexual maturity, ready to lay at a high rate. It's easy to follow, too:

Start with Wayne Pullet Starter from 0 to 8 weeks. From 8 to 22 weeks select either 14% Pullet Developer, 17% Universal Grower or 22% Pullet Grower. Stop in soon to discuss the Wayne Program designed for you. Your egg check later will prove you were right with Wayne now.

LANCASTER POULTRY CENTER

Prices Down One Cent

Live broiler prices at the September 12 auction at the Lancaster Poultry Center dropped more than a cent a pound from the previous week.

A total of 125,200 broilers in 18 lots ranged from 15 1 to 15.5 for a sale average of 15.18. The high lot of broilers was 800 White Vantress Cockerels at eight weeks consigned by Clarence Huber and purchased by W. C. Mellinger and Son. All broilers on offer were sold.

One lot of 1,000 pullets brought 24.5; a lot of 800 roasters sold for 18.1, and a lot of 800 pullets at eight weeks brought 17.

Three lots including 2,200 leghorn fowl ranged 9.1 to 9.2, and three lots including 680 heavy fowl brought 18.1.

The complete sale offered 135,934 head in 31 lots and sold 130,743 head in 27 lots.

Following is the complete sale report with lot number, seller, grower in parenthesis, amount and breed, age in weeks and days, buyer and price.

● Delmarva

Price Continues To Decline

Delmarva reported prices of 14 5 to 15.6 for 782,900 head at farms during the 24 hour period ending 10 30 Friday morning.

These prices represented a decline of more than a quarter cent over the previous day and include the sale of 392,300 head sold at Thursday's auction in Selbyville, Del. Demand was only fair for light auction offerings.

Estimated slaughter for the week end was 820,000 head compared to the 925,000 head slaughtered last week end by eastern shore processors.

The Delmarva broiler-feed ratio, for the week ending September 6 was steady at 3 0. Broilers averaged 15 40 during the week and 20 per cent mash cost the grower $102 05 per ton. The ratio for the comparable week a year ago was 3 8 when broilers averaged 17 89 and mash cost $95 31 per ton

The only GI insurance still being issued by the Veterans Administration is to veterans with a service-connected disability.

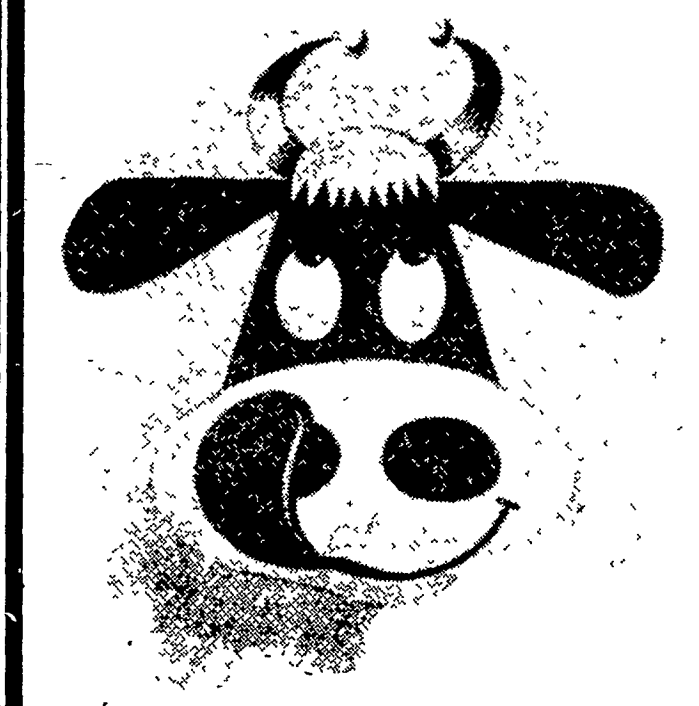
WIRTHMORE 14 RECORD FITTING and CALVING FEED



WHY SHOULD I USE WIRTHMORE FITTING AND CALVING FEED?

During the critical before-and-after calving period, your cows can expect:

- Safe liberal feeding
- High palatability
- Moderate protein
- High energy
- The needed vitamins and minerals
- Excellent calving condition

From Where We Stand . . .

What Does The Woollybear Say?

The woollybears are back!

Lancaster is about to lose its weather station, but we will still have the woollybear.

As you drive along almost any country road at this time of year you are apt to see several fuzzy caterpillars scurrying along.

Some of these will be the banded woollybears — the caterpillar you can use to predict the severity of the coming winter; at least that's what they say.

We have never found out who "they" are, but they go right on predicting the weather as revealed by the woollybear.

This caterpillar is black on each end with a band of orange-red in the middle. If you should pick one of them up it will curl into a tight ball of orange and black fuzz.

According to the legend (believers will please excuse the use of the word), if black covers most of the caterpillar, the winter will be severe, but if there is more orange, a mild winter is in store. A good way to remember which color predicts mildness is to think of orange as the column of red "mercury" in a thermometer A wide band of red means a high reading on the thermometer, or a mild temperature A narrow band of red means a low thermometer and a more severe winter.

No one has yet proven that the banded woollybear can be depended on as an accurate weather prophet. It seems likely that this can not be proven, but a few studies by the American Museum of Natural History indicate that there might be some correlation.

If you want to try your hand at prophesying the winter, we suggest you don't base your prediction on one caterpillar Find as many as you can and take the average of all of them.

It has been found that some woollybears are more reliable than others, and you might just be unlucky enough to come across a lying woollybear, and then where would you be?

According to others (we are just not sure who) some other insects are useful in predicting winter weather If hornet nests are placed high in trees (some say low in trees), it signifies a mild winter Frost is supposedly six weeks away when you hear the first katydid, and if mud dauber wasps build close to the ground, the summer is supposed to be dry.

But still the black and orange caterpillar is most widely accepted as a prognosticator of winter weather, just as the groundhog is the harbinger of spring

In any event, don't burn your red flannels and cancel the fuel delivery no matter what the woollybear tells you.

At least that's how it looks from where we stand.

Poultry Optimists

"We're coming back stronger than ever."

This is the view expressed by the planners of the annual Northeastern Poultry Producers Council (NEPPCO) convention.

They say that the northeastern poultry producer has been taking a pessimistic viewpoint for several years, but is now developing a sort of enthusiasm which has not been seen for a long time.

For several years now, they say, the eyes of the industry have been looking back over increasingly stooped shoulders at the mushrooming growth of the Dixie egg producer. The subsequent overflow of egg production from the southeast left a permanent scar on the previously well-entrenched northeastern grower.

Now, say several of the veteran observers of the scene, the southern mushroom has reached maturity and the egg producer in the Northeast has not only adjusted to the tumult from the Deep South but is staging a comeback that will be remarkable to watch in the months and years ahead.

We all know that egg production in the Northeast has undergone a revolution in the past year or so, and it appears that the revolution has not yet run its course.

There are processors who are in the market for more eggs produced in this area. Many of these processors are willing to pay a premium for high quality local eggs if they can get them in a large and uniform volume. Processors have found that shipped eggs, no matter how high in quality when packed, will not retain their quality for very long.

We believe there is a good reason for optimism in the Northeast egg producing community. We believe there is still room for egg producers in this rich market area. While the Southeastern boys might have got the jump on us and may be able to cut costs of production, we still have the markets to our advantage.

At least that's how it looks from where we stand.

★ ★ ★ ★

Dairy farmers demonstrated the efficiency of American agriculture in 1962. From the smallest cow population on record, dairy producers obtained an all-time high milk output — 125 8 billion pounds. Unfavorable weather conditions during 1962, in several of the leading dairy regions of the nation, made this production record all the more remarkable

★ ★ ★ ★

Measure of Greatness — From the Howard, S D, Miner Co. Pioneer: "When you meet a really great man, he seems so simple and modest you gain a new faith in your own possibilities."

See Your Country — From the Jackson, Mo. Pioneer: "A general show of pride in our country would do us no harm right now. And the best way to generate such honest enthusiasm . . . is to see some of it.

★ ★ ★ ★

No more jokes about Limburger cheese, please! Cheese makers tell us that there's a fast developing taste for this product. Limburger cheese production in 1962 was up 25% over the year before.

James Madison is known as the "Father of the Constitution." Madison's ideas were embodied in the Virginia plan, which became the basis for the Constitution, and his speeches and attempts at compromise often kept the constitutional convention from breaking up

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Forgiveness

Lesson for September 15, 1963

Bible Material: Genesis 37 through 50

Devotional Reading: Matthew 5.38-44.

THE whole story of Joseph in Egypt makes one of the most fascinating tales in the world. There is not a miracle in it and yet it is more wonderful than many a story of magic, white or black. It is the story of a slave boy who rose to a throne all his own. He came just as close to being king as a man could be, and certainly wielded power not second even to that of the Pharaoh. (Pharaoh, by the way, is not a name, but a title, like King or Emperor.) There is just one point in that story which takes our attention this week: the climax of the plot, we might call it, where Joseph finally confronts his brothers face to face, has those ruthless men in his power . . . and forgives them!

Dr. Foreman

Love is the basis

What might have been a story of vengeance—evil for evil—turns out to be a story of good . . . good that is beyond most people's imagination even; returning good for evil. Joseph had never read the New Testament, and yet he acted just as if he had been reading the sermon on the mount. He has in his power the men who plotted against his life, and yet he forgives them. Why? The word "love" is not used in this story. Joseph himself may have been a sentimental man, but his biographer was certainly not. Joseph was brave, and chivalrous and loyal, but those adjectives are not used by the inspired story-teller. He doesn't have to use the word. Just try telling the story to people who never heard it before, and ask them. Why did Joseph forgive his brothers? They will probably give the natural reply: He must have loved them very much. That's very clear, isn't it? What other motive could produce such whole-hearted forgiveness? So-called forgiveness on any other basis, isn't the real thing. Men "forgive" others for show, or because it's demanded of them by society, or to get rid of an unpleasantness . . . but the result is coldness and aloof suspicion, not true forgiveness.

Repentance the condition

But the day when Joseph forgave his brothers was not the first day he had seen them. Why didn't he forgive his brothers on sight? Why the delay? Why all that business of the state dinner, and the cup in the sack of grain? Couldn't he have forgiven his brothers right away? The reason for his waiting lay in the fact that when the brothers came to Egypt the first time, Joseph had no way of knowing what they were like now. In more than 20 years, much can happen. Had they changed or were they all the same conscienceless devils they used to be? Joseph had to find out. The Judah who so eagerly offered his life for the life of his brother Benjamin was a different man from the Judah who sold his brother Joseph into slavery. Probably the others were different too; Joseph, a good judge of character, may have seen in their faces that they sympathized and agreed with Judah. Something real, something new had entered the picture. This new thing was **repentance.** The meaning of that word is transformation-of-the-mind, a new way of looking at life. True repentance is not a flash of regret, it is a continuing change of heart. Without it there can be no forgiveness. Readiness to forgive, yes; but not forgiveness. Not even God offers forgiveness to those who will not repent.

Action is the proof

If forgiveness like repentance is an inward thing, an attitude, how can we tell when it is genuine? Well, the New Testament speaks of the "fruits of repentance" and might well speak of the "fruits of forgiveness." We have good reason to believe that Judah had repented because of the way he acted about Benjamin and Jacob We have equally good reason for being sure that Joseph really forgave his brothers, by what he proceeded to do for them. True forgiveness is not an eraser to wipe off the past and leave the blackboard clean. It is not a disinfectant to destroy the germs of hate. Rather, forgiveness is positive, creative. It draws a fresh new picture of life; it brings health The forgiver proves himself by serving those he forgives. You can never see a forgiving spirit; but you can see such a spirit in the actions it inspires

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

To Topdress Alfalfa

Stands of alfalfa that are to remain hay for another year could be treated this fall with an application of phosphorus and potash fertilizer, the use of 300 to 400 lbs per acre of an 0-20-20 or 0-15-30 will strengthen the plants and increase yields next summer This application made after the removal of the last cutting is strongly advised

To Segregate Shipped Cattle

The introduction of feeder cattle into the county will be heavy in the next few months. The danger of shipping fever is present with the movement of any kind of livestock When new cattle are brought to the farm or into the barn, it is essential that these cattle do not come in contact with acclimated animals, or are not permitted to eat or drink from the same equipment Feeders cannot be to careful in keeping these animals separate.

To Pack Trench Silos

Many trench silos will be filled in the coming month. In preparing the old trench for the fresh silage it is best to clean out all weeds and old silage and smooth down the sides, if they are of dirt fill Also, in order to prevent the dry soil along the sides from soaking up the juices in the silage and creating a mold, it is advised to soak down the dirt sides just prior to filling A heavy wheel tractor should be used during the filling operation to compact the forage as firm as posible. Seal the top of the silo with plastic, limestone, or sawdust within 18 hours after filling.

To Beware Of Silo Gas

Don't be guilty of breathing in poisonous gas from your freshly cut silage, in the more drouthy parts of the county this problem could be as serious as last fall. Be sure there is plenty of fresh air moving in the silo and the silo chute before you go near or into the silo Run the blower for several minutes before entering; open the windows, in

(Continued on Page 5)

● Now Is The Time

(Continued from Page 4)

the chute and the barn to get all possible ventilation. Be alert for dead birds, chickens, or cats that may give you some warning of the trouble. Silo gas is dangerous and may form this fall in some area.

To Cull Poor Cows

Many first calf dairy heifers are freshening during the late summer and fall months. This is a good chance to cull out the low producers and the border-line cows. Use production records over a period of years to determine the cows that are making the most net return each year. DHIA records should be very useful.

A locust devours its own weight in food every day and when an army of locusts, which may weigh as much as 50,000 tons, descends on crops, they consume the food of 5 million people every day.

● Feed Dealers

(Continued from Page 1)

Sons, Canton, Pa — Second Vice-President, Milton Godshalk, Flory Milling Co. Bangor — Third Vice-President; John L Zug, John L Zug & Son, Inc, Richland, Pa. — Treasurer

Clarence Keener Has Top Cow In D.H.I.A.

A registered Holstein cow in the herd of Clarence Keener, Manheim R3, finished her 305 day lactation in July with 16,602 pounds of milk and 945 pounds of butterfat for the highest lactation in the Red Rose Dairy Herd Improvement Association

The high monthly average during the month was made by the 27 registered Holsteins in the herd at the Red Rose Research Farm The herd averaged 1,701 pounds of milk with a 3 7 per cent test and 63 pounds of butterfat per cow

Second high average was made by the 21 registered Holstein cows owned by John E Esh, Gordonville R1 The herd had 60 pounds of butterfat in 1,574 pounds of milk with a 3 8 per cent test

Second high lactation was produced by a registered Holstein cow in the herd of Hiram S Aungst, Elizabethtown R1 She made 20,066 pounds of milk and 876 pounds of buttertat

Three other cows in the association had more than 800 pounds of butterfat during the lactation ending in July They were in the herds of Christ K. Lapp and Son, C Robert Greider, and Mark P. Stoltzfus

● County A.S.C.

(Continued from Page 1)

in 1956 He was first elected to chairmanship in September of 1962 after serving as interim chairman in 1961-62 following the death of Landis Becker

Other officers reelected were Elmer Huber, Pequea R1, vice chairman, and John J Herr, Mount Joy R1, regular member

Frank W Aument, Holtwood R1, was elected first alternate member, succeeding Russell Drumm, Denver R2 Aument was a second alternate member last year

The second alternate member went to J Wade Groff, Holstein breeder from Lancaster R7

Community committeemen were elected last week by mail balloting

Seldomridge, who was elected community committeeman from Salisbury and Leacock Twps last week, resigned his chairmanship following his reelection to the county committee Thursday night He was succeeded by Robert Mast, Narvon R2.

Both Aument and Groff are also committeemen in their respective townships

County committeemen take office on Oct 1

Rhode Island was the only state that refused to participate in the constitutional convention of 1787.

Steer Feeders —

PROBLEMS ASSOCIATED WITH CATTLE GOING ON FEED

Digestive disorders and a slight transient depression in appetite in newly-arrived cattle in the feedlot have been problems for a number of years. There are numerous causes:

1. **The sudden change in type of feed, for example, from grass and milk to grain, silage and/or hay and a protein supplement.**
2. **Too rapid pushing of grain concentrates.**
3. **Too much protein.**
4. **Not enough roughage.**
5. **Too much high quality roughage.**
6. **Unpalatable feed.**
7. **Too much green chopped legume or grass silage.**
8. **Feeding soft or immature corn. If not moldy, soft corn is satisfactory, but animals must be accustomed to it gradually (Morrison).**
9. **Too much green chopped corn causing green corn poisoning.**
10. **Too much silage fed to lighter weight calves. Calves do not have the digestive capacity to obtain their total digestible nutrients from a full feed of silage alone.**
11. **Digestive disorders caused by infections.**
12. **In addition, in connection with supplements containing an antibiotic, there is an adjustment of the rumen microflora to the antibiotic. This may cause a slight depression in rumen function and reduce appetite for 24 to 36 hours after the initial feeding. Softer feces also may be noticed. This effect is transient and after 36 to 48 hours the appetite should be restored to normal.**

For a successful and profitable steer feeding program designed to minimize these problems contact any Miller & Bushong Service Representative or call us direct at Lancaster, 392-2145.

Open Forum On Project 70 Is Scheduled

Dr. Maurice K Goddard, Pennsylvania Secretary of Forests and Waters, will be the main speaker at a public forum on Project 70 next Wednesday, Sept 18, at 8 p m. in the Armstrong Auditorium.

Robert K. Mowrer, chairman of the Parks and Open Space Advisory Committee of the Lancaster County Planning Commission, said all public officials and citizens of the county are invited to attend the meeting

Mowrer said, Project 70 is a far reaching proposal to provide funds for acquiring rapidly disappearing open land throughout the state for regional and community parks, water reservoir sites, historical markers, and hunting and fishing areas. Funds would be made available to counties, cities, boroughs, and townships as well as the state to acquire the land needed for recreation and conservation projects

Dr Goddard is nationally recognized as one of America's foremost conservationists and a leader in the development of parks, recreation areas and water resources.

The County Planning Commission and its Advisory Committee has endorsed PROJECT 70 in principle feeling that it is one method for acquiring recreation and conservation areas necessary for our rapidly increasing population

The Commission's staff is now in the process of completing a county-wide inventory of existing parks, recreational facilities and open space areas

Members of the Parks and Open Space Advisory Committee are. Robert K Mowrer, Willow Street; Robert E. Fasnacht, Ephrata; Mrs W. Scott Heisey, Rheems, Clyde H. Kauffman, New Holland, Orville H. Schwanger, Sr , Elizabethtown, Clayton B. Shenk, Ronks; D Curtis Amidon, Lititz; Mrs Douglas R. Armstrong, Lancaster, Henry F Wagner, Mountville and Eugene D Scribner, Bareville

Roger Emig Will Judge Jr. Dairy Show

Roger Emig, Field Supervisor for the Southeastern Pennsylvania Artificial Breeders Cooperative, will be judging master showmen at the annual Pennsylvania Junior Dairy Show next week at the Farm Show building in Harrisburg.

The show will feature 4-H and FFA dairy animals which won blue ribbons earlier this year at regional and district shows.

Emig will be watching the youthful showmen rather than their animals at the state show next Thursday, to see which club member does the best job of exhibiting his or her club project

Kirkwood 4-H Visits Factories

Twenty-six Kirkwood Community 4-H Club members and their leaders visited two Quarryville industries in a program to become better acquainted with the Solanco area

At the club's final meeting of the season, members toured Stoner's Ink plant and the Universal Trailer Corporation factory

During the business meeting members gave reports of their projects and leaders complimented them on their successes at county roundups Progress of the float to be entered in the Solanco Fair parade was reported and Miss Barbara Maule gave a demonstration on planting house plants

Refreshments were served by Mrs Dorothy Johnson, Mrs. Helen Hastings, Mrs Audrey Whiteside, and Mrs Henry Wenger, all members of Farm Women Society 15.

Sr. Extension Plays Host To County Clubs

By: Darlene Bucher

Lancaster County Senior Extension Club's second annual Field Day was held Sunday, September 8, at the Sico Park in Mount Joy

Approximately 60 young people from the local club and nearby county clubs attended.

Afternoon activities included softball and volleyball games. Miss Karen Lutz, Rothsville, and John Wolgemuth, Mount [redacted] Joy, chairmen, were in charge of these activities

The evening lunch was provided by the food committee under the direction of Mr. and Mrs. Ralph Kreider, Quarryville.

Following lunch, the club held its monthly business meeting with Dale Shirk, Quarryville, presiding Plans were made to do exhibition square dancing at the Harvest Festival on October 5th and 6th at the Landis Valley Farm Museum.

Joy, program chairman, introduced the speaker for the evening, the Rev James Ober of Mount Joy. The day's activities closed with a "signature" presented by members who recently attended the Rural Youth Conference in North Dakota.

Franklin County Senior Extension Club received double recognition since it had traveled the greatest distance to Field Day and also had the largest representation.

Cranberriers For Fall

By Mrs. Richard C. Spence

Fashion notes dictate that the cranberry color is all the go for this fall and winter! Let us not be outdone by the clothing fashion — the cranberry "flavor" as well as the color can hold reign in our cooking and add much to enhance many of the foods we eat Cranberry sauce or cranberry juice are good "just so", but how good they are when combined with other foods

Next time you serve roast lamb try this refreshing combination —

CRANBERRY MINT SALAD

1 package strawberry-flavored gelatin
1 cup hot water
1 can (1 ponud) jellied cranberry sauce
¼ teaspoon peppermint extract

Dissolve gelatin in hot water. Chill until thickened slightly. Crush cranberry sauce with fork. Beat until saucy. Stir into gelatin with peppermint extract. Pour into 6 individual molds. Chill until firm. Serve on slices of canned pineapple. Makes 6 servings.

* * *

Cranberry Butter Basted Chicken is a real company special. Broiler chickens are used for this. Three broilers will make 12 servings Have the butcher quarter the chickens Place the pieces in foil lined pans. Brush with ruby red cranberry butter and bake for about 1½ hours

CRANBERRY BUTTER BASTED CHICKEN

½ cup jellied cranberry sauce
½ cup butter or margarine
3 broilers (1½ pounds) cut into quarters

Beat cranberry sauce until smooth in small pan. Add butter and stir together over low heat to combine cranberry sauce and butter. Wash and dry chicken pieces. Sprinkle salt and pepper and place in shallow foil-lined pan. Spoon sauce over chicken. Bake at 350 degrees basting every 15 minutes until chicken is tender (about 1½ hours). Serves 12.

* * *

Another combination of chicken and cranberry sauce —

CHICKEN 'N CHEESE SHORTCAKE WITH CRANBERRY SAUCE

12 (3-inch) squares cornbread, split in half shortcake fashion
4 cups cooked chicken or turkey meat
4 cups shredded sharp cheese (about 1 pound)
2 (1 pound) cans whole cranberry sauce, heated

Place buttered cornbread squares (split) on baking sheet.

Distribute chicken pieces over cornbread squares. Cover with shredded cheese. Broil 4 inches from heat source until cheese melts or bake ½ hour at 350 degrees. Stack two squares high, shortcake fashion, on serving plate and top with hot cranberry sauce. Makes 12 servings.

* * *

Crystal clear cranberry aspic salad molds go especially well with chicken. They are made with colorful cranberry juice cocktail. You can add a refreshing sparkle to the cranberry aspic with gingerale or a new flavor twist with bouillon. Here is a new way to make chicken.

PATIO CHICKEN

2 pounds chicken breasts and legs
¼ cup melted butter
1 cup bread crumbs
1 teaspoon onion salt
¼ teaspoon garlic salt
½ teaspoon each: pepper, monosodium glutamate, chopped parsley, curry powder
1 cup mayonnaise

Brush chicken with melted butter. Roll in mixture of bread crumbs, onion salt, garlic salt, pepper, monosodium glutamate, parsley and curry powder. Arrange crumb coated chicken on foil-lined cookie sheet, skin side up and not overlapping. Place in hot oven (400 degrees) for 15 minutes to set crumbs. Remove from oven. Brush generously with mayonnaise. Reduce heat to 300 degrees and bake for 1 hour or until chicken is tender. This chicken may be served hot or cold with a cranberry aspic mold.

* * *

CRANBERRY COOLER ASPIC SALAD MOLD

1 envelope unflavored gelatine
1½ cups cranberry juice cocktail
½ cup tangerine juice
¼ cup apple juice
¼ cup gingerale

Soften gelatine in ½ cup cold cranberry cocktail. Heat 1 cup cocktail to boiling point. Add softened gelatine and dissolve. Stir in tangerine juice, apple juice and gingerale. Pour into lightly oiled individual molds. Chill until firm. 4-6 servings.

* * *

CRANBERRY BOUILLON ASPIC SALAD MOLD

1 beef or chicken bouillon cube
1 cup boiling water
1 envelope unflavored gelatine
1 cup cranberry juice cocktail
¼ cup orange juice
⅛ teaspoon cloves

Dissolve bouillon cube in boiling water. Soften gelatine in ½ cup cranberry juice cocktail. Dissolve softened gelatine in hot bouillon. Add the remaining ½ cup cranberry cocktail, orange juice and cloves. Pour into lightly oiled individual molds and chill until firm. 4-6 servings.

* * *

Here's another sweet and sour dish, rice this time, to serve with baked chicken.

CHIVE CRANBERRY RICE

3 tablespoons margarine or butter
½ cup finely minced celery
1½ cups water
1 cup cranberry juice cocktail
2 tablespoons grated orange rind
1¼ teaspoons salt
1 cup white rice
2½ tablespoons frozen chopped chives

Melt margarine in saucepan, add celery and saute about 5 minutes. Add water, cranberry juice, orange rind and salt. Bring to a boil; add rice and 2 tablespoons of the chives. Cover, reduce heat and simmer 20 minutes. Sprinkle with remaining thawed chives and serve. Makes 4 servings.

* * *

Here are two ways to perpare franks —

BARBECUED FRANKS

2 tablespoons fat
¼ cup chopped onion
1 tablespoon sugar
1 teaspoon dry mustard
1 tablespoon Worcestershire Sauce
1 can (1 pound) jellied cranberry sauce, fork-whipped until smooth
4 teaspoons vinegar
½ cup water

pound frankfurters (10)

Cook onion in fat until tender. Add remaining ingredients (except franks) and simmer, covered for 10 minutes. Add franks and simmer 15 minutes longer. Makes 5 servings.

* * *

CRANBERRY FRANKS

(1 pound) can jellied cranberry sauce
½ cup sugar
1½ teaspoons curry powder
1 teaspoon nutmeg
¼ teaspoon ground ginger
1 teaspoon salt
½ cup cider vinegar
2 tablespoons molasses
1½ teaspoons Worcestershire Sauce
2 pounds frankfurters

Beat cranberry sauce with rotary beater until smooth and saucy. Combine with remaining ingredients except frankfurters. If outdoor grill is used, simmer sauce 5 minutes. Diagonally cut frankfurters. Dip in sauce and grill-basting frequently. If oven is used, place diagonally-cut frankfurters in foil-lined casserole dish. Cover frankfurters with sauce. Bake in 350 degree oven for 30 minutes.

* * *

Packaged mixes and baked goods make festive foods possible in a matter of minutes. Choose tender packaged tart shells to hold colorful cranberry fillings

CRANBERRY PARFAIT TARTS

8 packaged tart shells
1 pound can jellied cranberry sauce
2 tablespoons sugar
½ pint heavy cream, whipped
½ teaspoon almond extract

Beat the cranberry sauce and sugar together with a fork. Fold in whipped cream and flavoring Spoon parfait into 8 tart shells and place in freezer. Freeze until parfait is firm.

* * *

WINTER FRUIT TARTS

2 cups fresh cranberries
1 medium apple (core and seeds removed)
1 large banana, diced
⅔ cup sugar
6 packaged tart shells
Sweetened whipped cream

Coarsely chop cranberries and apple. Add diced banana and sugar. Stir until fruit and sugar are well blended. Place in refrigerator for 2 to 3 hours for flavors to blend. Spoon into tart shells at serving time. Top with sweetened whipped cream.

* * *

CRANBERRY PRUNE WHIP TARTS

1 cup cooked prunes
1 pound can jellied cranberry sauce
Dash salt
2 egg whites
¼ cup chopped walnuts
6 packaged tart shells

Pit prunes Press prunes and cranberry sauce through sieve. Add salt Beat egg whites stiff. Beat fruit mixture into

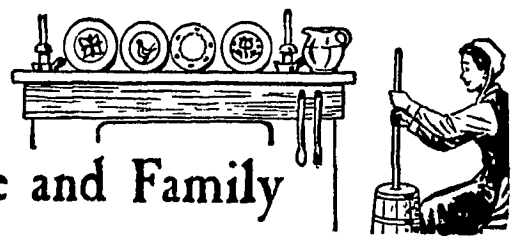
For the Farm Wife and Family



Ladies, Have You Heard? . . .

By: Jane Thurston, Extension Home Economist

Never Outgrow Need For Breakfast, Daily

THURSTON

Breakfast is more than a quaint custon It is the important meal of the day Breakfast should provide one-fourth to one-third of the day's food needs

Persons who eat a good breakfast generally are more alert, can turn out more work, and don't tire so easily as those who don't eat breakfast or who eat a poor one Also, persons who eat breakfast are less likely to have accidents in late morning hours, because they can think clearly and act quicker than the breakfast-skipper.

Another very important reason for eating breakfast every day is that the breakfast-skipper seldom makes up for the nutrients he missed in this first meal of the day.

VARY METHOD WHEN COOKING VEGETABLES

Put a touch of imagination in vegetable cookery and treat your family with old favorites in a new way.

You can do this when you prepare and serve vegetables in a variety of ways To braise fresh zucchini, cabbage, broccoli, or spinach, cook minced onion in a little fat, and add chopped or sliced vegetable Sprinkle vegetable with a few tablespoons of liquid, add seasonings, cover the utensil and steam until vegetable is tender, but still slightly crisp

The Chinese method of cooking vegetables is similar to braising. The Chinese use finely chopped vegetables, fat instead of water, and a quick heat source The finished product has a fresh flavor, bright color, and crisp texture.

Use the oven to bake vegetables, especially when the oven is already in use. Carrots develop a new sweetness when baked in a covered dish with added seasoning, butter, and a few tablespoons of water. Frozen vegetables are other candidates for oven-baking. Put frozen vegetables in a casserole, add seasonings, and cover the dish. Stir once during baking to mix seasonings.

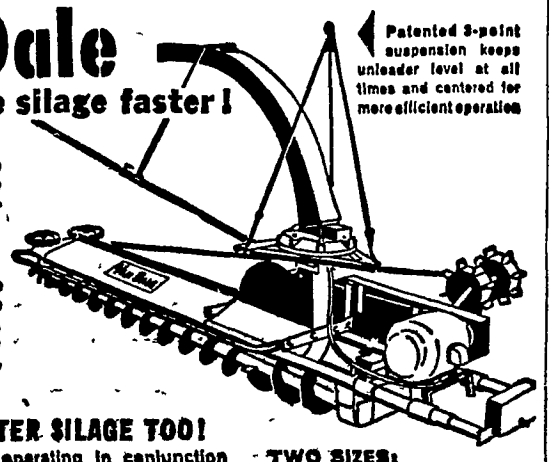
A pinch of thyme, basil, rosemary or other favorite herb adds a different flavor to fresh vegetables. Or try serving new combinations, such as Brussels sprouts with Parmesan cheese

(Continued on Page 10)

Get the BIG silo unloader value!

VanDale

Delivers more silage faster!



Patented 3-point suspension keeps unloader level at all times and centered for more efficient operation

Double auger system digs the silage faster and more evenly under all conditions whether silage is frozen, wet, or dry.

Exclusive, adjustable drive hub gives more positive traction, keeps the machine operating evenly, and requires less power.

DELIVERS BETTER SILAGE TOO!

The double augers, operating in conjunction with the patented V-paddle impellers, *digs* the silage, *mixes* it thoroughly, and then *throws* it down the chute. Your cows and cattle get good, palatable silage . . . not a powdered mash as so often happens with unloaders using blowers.

TWO SIZES:
Standard—for silos 16' to 19'
Heavy Duty—for silos 18' to 30'

● For The Farm Wife

(Continued from Page 9)

egg whites a small portion at a time. Mixture will increase in volume with beating. Fold nut meats into whip. Spoon into tart shells. Chill.

* * *

CRANBERRY CHIFFON TARTS

1 cup cranberry juice cocktail
1 package strawberry or lemon chiffon pie filling mix
⅓ cup sugar
12 packaged tart shells

Chill ½ cup cranberry juice cocktail. Heat remaining half cup to boiling Add to pie filling mix in a large mixing bowl and stir well. Add the chilled cranberry juice and beat vigorously with rotary egg beater or electric mixer at highest speed until mixture is very foamy Add sugar and beat until mixture stands in peaks — takes 1 to 3 minutes. Spoon into tart shells Chill until set (about 2 hours). Serve plain or with whipped cream.

HOT CHICKEN SALAD

1-½ cups ready-to-eat high protein cereal (Special K)
3 cups diced, cooked chicken
3 tablespoons finely chopped green onions
1 cup finely cut celery
3 tablespoons cut pimiento
¼ cup chopped, pitted ripe olives
1 cup cooked salad dressing
½ teaspoon salt
1 tablespoon butter or margarine, melted

Crush cereal into coarse crumbs. Combine all ingredients except cereal and butter. Divide chicken salad into 6 greased individual casseroles. Combine cereal with melted butter and sprinkle over chicken salads Bake in moderate hot oven (400 degrees) about 15 minutes or until thoroughly heated 6 servings, ⅔ cup each

FRUIT STAINS NEED PROMPT ATTENTION

Promptness in removing fruit or grass stains can save time, energy, and money. Many stains are easy to remove when fresh, but hard or impossible to remove later, especially if set by heat.

A stain removal method should be geared to both the fabric and stain. Before using a stain remover, decide if the stain is greasy, nongreasy, or a combination, and if fabric is washable or nonwashable. To find out if the stain remover will change the appearance of a fabric, test it first on a seam allowance, hem, inside of a pocket, or tail of a blouse or shirt.

To remove a fruit stain from a washable fabric, wash the stained area with a synthetic detergent, then rinse. If stain remains, use a bleach if safe for the fabric. Some fruit stains may be removed with boiling water poured from a height of 1 to 3 feet through the stain. Before using hot water treatment, make sure it won't affect the fabric or color. On a nonwashable fabric, sponge the stain with cold water first. If necessary, apply a liquid synthetic detergent to the stain, then rinse stained area only.

For a grass stain on a washable fabric, rinse stained area with cold water then rub in synthetic detergent and wash. Bleach last traces of stain with hydrogen peroxide. On a nonwashable fabric, use the same procedure if color will withstand the treatment. If garment must be drycleaned, identify the stain for the drycleaner.

EST FOOD BUYS

ork Loins Are Fall Feature

Retail food stores take on look of fall this week with atures in pork loin roasts, rkeys, apples, pears, grapes, d many fall vegetable items. heck the food ads before you ake out your shopping list. ou're bound to find your mily's favorite food in one ore or another.

Pork Season Approaching

Meat counters will have ore and more pork sales as e fall months roll into win- r. It's time to start watch- g for "specials" in pork and take advantage of heavier pplies. Most pigs are born spring and come to market late fall so retail prices are nerally lowest in December. or a change in meat features, any area retailers are offering pork loin roasts at special prices this week.

What Is A Pork Loin?

The pork loin extends from the ham to the shoulder. It contains the backbone and upper part of the ribs. The meat consists of thick, tender muscles that run the entire length of the loin and a smaller muscle, the tenderloin, which extends about one-third of the length from the ham end. Retailers generally cut the loin into three sections; the loin end, center chops, and rib end. Or they may cut the loin in two and sell the roasts as halves which contain the more expensive center cut.

Small Turkeys

September is small-size turkey eating time. The 6 to 16 pound sizes will get special merchandising efforts this month. Prices will be lower than they sometimes are, but perhaps not lower than the price of large turkeys. The smaller size turkeys cost more per pound than larger turkeys, partly because of processing costs.

Fruit Counters Changing

You'll find plenty of Bartlett pears on local markets. Don't let russetting fool you for this does not hurt eating quality in the least. The Thompson seedless grape crop from California is reported to be the largest on record. Quality is excellent. Apples are becoming more and more plentiful. Other fruit values are peaches, and melons.

Farm Women 10 Hosts Society 20

Farm Women Society 10 played host to society 20 and all the officers of the County Farm Women at a recent meeting in the Manor Shopping Center auditorium.

Miss Francis LeFever was in charge of devotions.

Considering the thought "A noble woman does not find roses in her path, she leaves them there," the roll call was answered by what rose each woman desired to leave

The group decided to make 40 table arrangements for Thanksgiving at the Embreeville Hospital

Donations of $10 to the Needlework Guild and $30 to the United Campaign were voted

October 16 the group will sew at Lancaster General Hospital.

Speaker for the day was Miss Sarah Stauffer who first explained the new Homemaker's Service. This was followed by slides and a talk by Miss Stauffer on her trip around the world.

On Oct. 5 the women will entertain their husbands and guests at 6:30 p.m. at the Meadow Hills Dining Room.

Farm Women 7 Sponsor Orphan

Members of Farm Women 7 have voted to sponsor an orphan in India for the second consecutive year. The decision was made at a recent meeting in the home of Mrs. Henry Ebersole, Paradise; Mrs. Mildred Hersh, co-hostess, was in charge of devotions.

Donations were made to the United Campaign, Arthritis Foundation, Lancaster Branch of the Needlework Guild of America, and Christ Home at Warminster and Paradise.

Mrs. Aaron Denlinger, president, reported on a recent county executive board meeting. The project for the year for the 24 societies is the Child Development Center. Twenty-five doolars was voted by Society 7 to the project.

A memorial service for Mrs Mary Singer Sheaffer, Mrs. Anna Paxton Girvin and Mrs. Josephine Steve Brown, members who recently died, was held. Resolutions were read by Mrs. Ella Mae Wenger, Mrs. Elsie Stiles and Mrs. Ruth Lichty.

Societies 7 and 8 will treat guests at the Lancaster County Home to pretzel sticks and bananas on Thursday, Sept 19. Representing Society 7 will be Mrs. Wenger, Mrs Clare Watson, Mrs Lichty and Mrs. Mary Mowery.

Plans were made for a bus trip on Thursday, Oct. 3, to Biglerville and Chambersburg to visit an apple plant and a pie firm. The bus will leave Paradise at 8 p.m

The society will hold a sub sale on Wednesday, Oct. 23, at the Paradise Elementary School Orders will be taken and deliveries made.

It was announced that a food company in Warminster has awarded the society a $100 savings bond for having collected the most flowers from containers of the firm's products in June.

Mrs. Claude Stauffer, Lancaster, spoke on the Needlework Guild of America.

Wild turkeys are legal game in Pennsylvania from Nov. 2 to No. 16 in those counties and areas not included in the Nov 2 to 23 season. The season limit is one.

Crops produced in their own vocational agriculture farming projects were entered as competitive exhibits last year by more than 1,200 Pennsylvania members of the Future Farmers of Pennsylvania.

CHECKERBOARD service bulletin

RAISE BIGGER, BETTER CALVES the PURINA WAY

The success of Purina's Calf Feeding Program is written in the Purina Research Farm records. Of over 2200 calves born—all raised on Purina calf starting programs—*less than 1%* have failed to grow to maturity. And did they grow!

FOUR MONTH OLD CALVES grown on Purina Nursing Chow and Purina Calf Startena are far bigger, growthier than average. The Purina Farm average of 320 lbs. for Holsteins is 48 lbs. heavier than the normal breed average at that age. At 225 lbs., Guernsey calves 4 months old are 8 lbs. heavier than the normal breed average.

Purina Farm-raised calves have the solid frame and development needed to grow into heifers that may be bred early to freshen months ahead of average. And they produce lots of milk over a long milking life.

Next time you start calves, give the Purina Way a try. Order Purina Nursing Chow and Purina Calf Startena —palatable, power-packed products—at our store.

Transfer Milk Efficiently From Cow to Bulk Cooler

The "Sputnick" MILK-PORTER is the cleanest, most efficient method for transferring milk from cow to bulk cooler.

- Manufactured from heavy gauge stainless steel.
- Lid seals tightly to keep milk germ free.
- Passes through openings 29" and over.
- Moves quiet and easily on rubber-tired, ball bearing wheels.
- Does away with long, expensive pipe lines, milk pumps and releaser.
- Two sizes.
- Low-cost sanitizing.

For Further Information, Write:

ALL "Certified" SEED IS NOT ALIKE

DON'T LET ANYBODY tell you all Certified seed is the same. There IS a difference! A. H. Hoffman Seeds, Inc. is not only the largest producer of "Certified" winter grains in Pennsylvania, but the superior quality of Hoffman "Certified" seeds exceed the state certification standards by a wide margin.

FOR EXAMPLE:

Penna. Certification Requirements for Barley		A. H. Hoffman's Certified WONG BARLEY (3 year average)
99.00% (minimum)	PURITY	99.79%
1.00% (maximum)	INERT MATTER	0.20%
90.00% (minimum)	GERMINATION	94.6%
46 lbs. (minimum)	WT. PER. BU.	48.8 lbs.

The certification tag is not enough. Hoffman tags on the seed you sow can mean bigger crop profits for you. That fact has been demonstrated over 60 years.

Get complete information and prices on Hoffman Wong BARLEY; Norline OATS, Red Coat, Pennoll, Dual, and Seneca WHEAT, Balboa and Tetra-Petkus RYE.

Contact your Hoffman Seedman or phone 898-3421 for delivery to your farm.

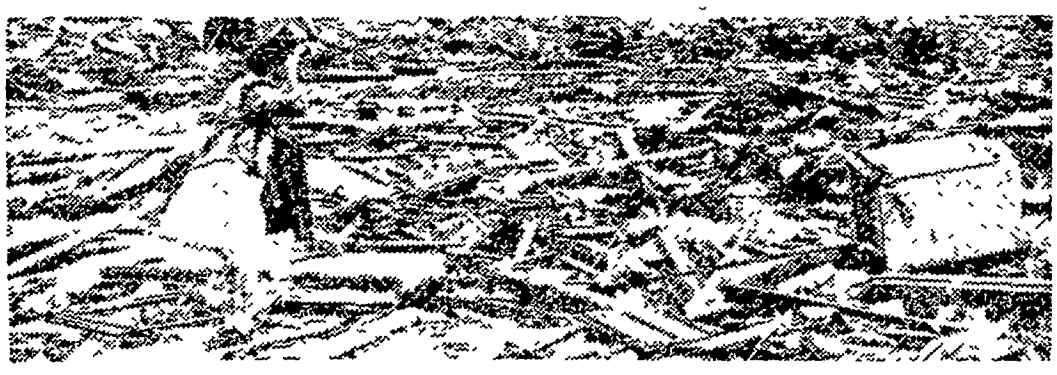
WHEN YOU GIVE THE RED CROSS CAN HELP IN MANY WAYS

It helps those whose lives and homes have been wrecked by disaster . . . it provides vitally needed blood for the ill and injured . . . its volunteers brighten the lives of servicemen far from home and bring cheer and comfort to the elderly . . . it gives safety and health instruction and training in good citizenship to the nation's youth . . . it lends a helping hand wherever it's needed. Help others through the Red Cross . . .



GIVE THE UNITED WAY

This ad contributed as a public service by . . . HAGER'S

Zimmerman

(Continued from Page 1)

teers push out on the ground. Zimmerman, who drives truck part time for K. Kenneth Wenger, usually buys feeder pigs in Virginia at about 150 to 170 pounds and fattens them out; he feeds out about 130 to 150 head a year.

He has an upright silo which he will fill, but he plans to continue to chop corn and feed it green until sometime in November. "That way, I won't have to put any silage in a trench or on a pile, and the silo will last all winter," he said. He said he believes the steers do well on the green chopped corn if it is not too young. He waits until the husks begin to turn brown before chopping.

In addition to raising steers, hogs, 700 laying hens, five acres of tobacco, 30 acres of corn, 12 acres of wheat, five acres of barley and eight acres of alfalfa, and driving a cattle truck, Zimmerman also does custom combining, silo filling, and a little corn picking

He believes in feeding his crops well and handling them as little as possible when they are ready to harvest.

SELF FEEDING WAGON WAS BUILT for very little cost by John R. Zimmerman, Ephrata R1. He took an old flat bed wagon and added the sides from a forage wagon. He took off the bottom board and put the sides on a slant. Chopped corn is blown into the wagon in the field and steers eat from the wagon. Hogs clean up what the steers push out on the ground. L. F. Photo.

No Other Protein Need When You Feed

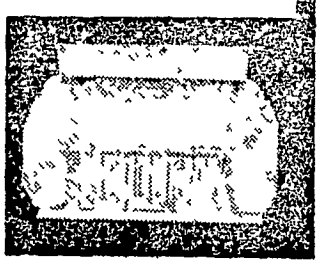
NOW... AN ENTIRELY NEW PROVEN SPREADER PRINCIPLE!

BRADY FLAIL-TYPE REAR END SPREADER

BRADY SELF-CLEANING CHAIN FLAIL MECHANISM

Spreads from the rear—like a spreader should—in a wide, smooth, uniform pattern. It's the "forward looking" spreader. No material on the driver. No "rear sentry" duty.



See it now . . . the revolutionary trouble-free spreader that handles all material . . . wet, dry or frozen . . . in any weather

Here's the Spreader of the Future . . . available today! This new rear delivery, flail type machine pulverizes and blanket-spreads all material—no chunks, no piles, no maintenance problems. So new, so modern, the Brady MS 141 Spreader defies comparison. Handles heavy feedlot material, dairy barn material and liquid material with equal ease! No more broken aprons, damaged sprockets, jammed beaters or frozen spreader mechanism. Rugged over built, all steel construction—torture tested for 2 years with every type material.

Cucumber Quality

Look for firm, fresh, bright cucumbers for salad use, advise Penn State extension foods specialists. The best cucumbers are deep green in color and may be whitish-green on the tips and along the ridges. The straight, slender ones have small, soft seeds and this makes these cucumbers ideal for salads. Withered, shriveled cucumbers often have a bitter taste. Yellow or light green ones are overmature and may be tough and rubbery.

● Fulton Grange

(Continued from Page 1)

er; Cathy Gilbert-Ceres, Mrs. Charles Jackson-Pomona; Joyce Giffing-Flora, Mrs Stanley Stauffer Jr.-Lady Assistant Steward, Mrs. E. Maurice Gregg-Pianist; Mrs. Susan Fite-Librarian, Mrs Ralph Armstrong and Mrs Philip Giffing-Flower Committee, C. G McSparran-Purchasing Agent, Executive Committee member-Philip Gifting, Finance Committee member-Charles Long, Juvenile Matron-Rebecca Kirk; Hospitalization Secretary-Mrs Dorothy Walton, Trustees-Theodore Beck and Russel Hartsoe.

The Grange voted to ask our Congressmen to introduce the necessary bills in Congress that would permit Bible reading without comment in our public schools They also are requesting the Solanco School Board to continue Bible reading without comment in the opening exercises.

The Community Service Committee announced that they had sent 300 articles of clothing to the State Hospital at Harrisburg during the year

The Grange has recently painted the exterior of their Grange Hall, refinished the floor of one room and is putting new drapes on the windows

Fulton Grange will participate in the parade at the Southern Lancaster Co Community Fair, Friday, Sept 20

The public is invited to attend a covered dish supper and Booster Night program Monday, Sept 23 7 30 p m There will be no charge but each family is to bring a meat dish and one other dish, their silver plates and cups Rolls, butter and drink will be furnished 50 and 25 year members will be honored Mr John Hoffman, Quarryville, will show some beautiful colored slides of his recent trip to the west coast via the Canadian Rockies Mrs. Jesse Wood will give a humorous reading "Doing It Electrically."

● Wentink Tells

(Continued from Page 1)

In broilers, Wentink said, the cost handicaps faced by state poultrymen are not as serious as it appears He said Pennsylvania broilermen have the advantage of learning from the mistakes and experiences to overcome the costs of production which the southern producer does not have

Broiler producers must get efficient or make way for those who are, he said The South has done a job of streamlining and efficiency engineering its production about which many Pennsylvanians are just beginning to think

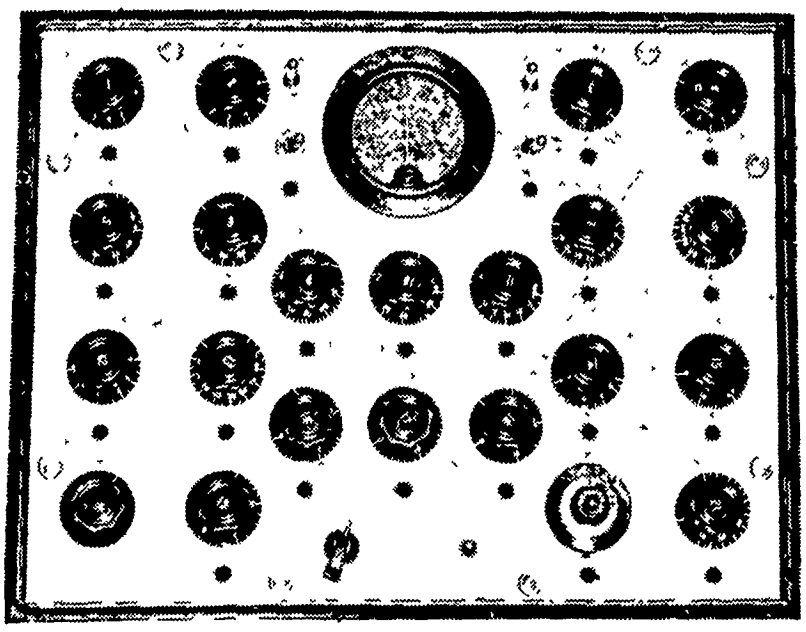
How much advantage we have over southern areas, he said, depends upon the actual difference in transportation costs necessary to reach the marketing point

Wentink also said a domestic rail rate reduction on grain and grain products from the west to the northeast "would be helpful, although feed manufacturers are divided on this"

Certain areas of the southeast have gotten freight rate reductions

He said the strong independents want the rail rate reduction, but some of the larger corporations do not want to lose the milling in transit privileges, he said.

The Veterans Administration provides hospital care daily for an average of 114,000 veterans.



Eliminate Costly Guess Work!

. . . electronic brain accurately determines optimum feeding level for each cow in your herd.

Maximum Profit Feeding:

Farm Bureau's "M. P. F." Program Is The Answer To The Profit-Minded Dairyman's Dream!

MAXIMUM PROFIT DAIRY FEEDING (M.P.F.) eliminates guesswork . . . . puts your feeding program on a sound and practical mathematical basis. NOW, you can obtain the greatest possible income over feed costs. FARM BUREAU'S "M. P. F." Program can help you reach this goal regardless of the size or breed of your dairy herd.

COWCULATOR Accurately Determines Optimum Feeding Level For Each Cow In Your Herd!

THIS AMAZING ELECTRONIC INSTRUMENT digests the vital information concerning each cow in your herd; her age, weight, reproductive stage, daily milk production and butterfat content. It takes into account the price of milk at your farm, the price and nutrient content of hay and silage, the nutrient content obtained from pasture and concentrate, and the weight of hay and silage fed daily. The COWculator sorts all of this information and computes the exact weight of concentrate required for Maximum Profit Feeding.

NEW STEP FORWARD In Scientific and Efficient Dairy Feeding!

THIS IS WHAT DAIRYMEN ARE SAYING ABOUT FARM BUREAU'S REVOLUTIONARY "Maximum Profit Dairy Feeding" PROGRAM. Take time to discuss Maximum Profit Feeding with your FARM BUREAU FIELDMAN . . . you'll Be Glad You Did.

Start Today . . . Feed the Farm Bureau Way!

Qualified FIELDMEN are anxious to serve and assist you in designing a PROFITABLE DAIRY FEEDING PROGRAM.
